

ICS-200 User's Guide Addendum #1

Software Update for 1.2.18

6/27/1999

file: ICS-200 Users Guide Addendum 1.pdf

With the introduction of ICS-200 software version 1.2.18, it is now possible for users to directly control more functions from the front panel. *EVI® recommends setting these functions after software upgrading.*

- Voice message volume, including a volume of zero
- Time and date, year 2000 compliant!
- Economy and autostart charging modes
 1. Turn on autostart mode to start charging immediately
 2. Economy mode requires the selection of start hour and end hour
 3. Economy charging can now start at 12AM
- kilowatt-hours voice message mode
 1. the voice message can be turned off
 2. MODE 1: kilowatt-hours from most recent charge
 3. MODE 2: total accumulated kilowatt-hours

Use the diagram on the next page to for help with setting these functions.

At the request of auto manufacturers, some changes were made to the charging protocols for multiple vehicle types under unusual conditions. For example, the EV+ and Ranger EV can charge more reliably at the same public autostart station. This is mode is enabled using the CG00650.200 configuration file.

The audio file has been updated with better sound quality and an increased vocabulary.
